SUMMARY

Second-year Software Engineering Technology student at Centennial College with hands-on experience building full-stack JavaScript applications. Comfortable across the stack: semantic HTML and CSS, Express routes and EJS templates, MongoDB data models, and the debugging that holds it all together. Looking for a co-op placement starting May 2027.

PROJECTS

Campus Course Planner 2026

Node.js | Express | MongoDB | EJS

- Built the Express API and data model that detects lecture and lab conflicts before registration.
- Adopted by roughly 200 students in its first term; reported timetable clashes fell from 31% to 4%.

TaskFlow Board 2025

JavaScript | HTML5 drag events | localStorage

- Implemented a keyboard-operable kanban board with offline persistence; passed accessibility review with no critical issues.

Weather Dashboard 2025

JavaScript | OpenWeather API | Chart.js

- Cut average load time to 0.9s on a throttled 3G profile and reduced API calls by 60% with a ten-minute cache.

EXPERIENCE

Peer Tutor - Centennial College Learning Centre Toronto, ON | 2025 - Present

- Run weekly drop-in sessions for first-year programming students on JavaScript fundamentals and debugging.
- Wrote a short troubleshooting guide that the department now hands out in COMP125 labs.

ADDITIONAL

- Languages: English (fluent), Mandarin (native).
- Available for co-op or internship starting May 2027; open to on-site work in the Greater Toronto Area.
